Post 4 — OpenMontage Creative Rebuild

Plan summary	Decision
Objective	Rebuild the creative direction and production of post 4 to generate qualified colored-paper trial conversations with relevant workshops. Distribution remains the broader campaign objective; do not market standalone ink.
Scope	Research, creative direction, narrative, visual treatment, sound, script, storyboard, assets, editing, rendering and delivery review.
Current stage	Research complete; proposal in progress pending resource discovery. No direction, script, generation budget or publication approved.
Working defaults	Vietnamese Facebook Reel, 9:16, approximately 20 seconds; Ánh Kim 180 and Ivory 230. These are inherited assumptions and remain revisable.
Recommendation	Build around evidence a workshop buyer can evaluate, not an invented factory story. Choose the direction after confirming available proof and filming resources.

```
Research → Confirm evidence/resources → Direction + brief approval
→ Script approval → Storyboard approval → Asset review
→ Edit + sound → Render + QA → Delivery approval
                                  Publishing: separate authorization
```

1. Creative directions to investigate

Direction	Viewer experience	Required resource / boundary
Material intimacy	Close-up paper movement, surface detail and handling sounds; curiosity becomes sensory closeness.	Real sheets filmed under changing light. Do not fabricate texture or moving reflections from a photograph.
Workshop trial	Observe a printing or folding trial; uncertainty becomes informed control.	Equipment, operator access and documented conditions. Show the actual outcome; never assume success or universal compatibility.
Sheet to application	Discover the invitation, envelope, bag or box behind the sheet; possibility becomes professional recognition.	Genuine finished pieces with confirmed stock provenance. No invented sheet-to-product transformation.

Direction	Viewer experience	Required resource / boundary
Human evaluation	Watch someone assess samples for an actual job; distance becomes collaborative confidence.	A willing participant and real evaluation task. No staged testimonial presented as spontaneous opinion.

Previous assumption	Rebuild rule
Female worker and traditional papermaking	Optional only if appropriate, authentic and verified; neither is required for the new film.
Male viewers aged 25–35	Not a validated buying segment. Prioritize the actual stock buyer and application rather than assuming demographics establish demand.
Existing creator reference	Historical context, not a locked template. Select a suitable evidenced hook source before drafting a new opening.

2. Production workflow

Stage	Output / action	Gate
Research — completed	Product/context review, 10 free web searches, seven substantive pages read, four research territories.	Research is not audiovisual verification: no reference films watched or tracks auditioned.
Resource discovery — next	Confirm actual buyer hesitation, genuine product evidence, filming possibilities and trial terms.	Ask the user for resources, facts or permissions the agent cannot obtain.
Creative proposal	Direction options, reference/mood review, emotional arc, sound approach, production method and itemized external costs.	User selects or combines directions and approves the brief and production approach.
Script	Timed Vietnamese words and visual beats grounded in the approved brief.	Confirm story tension and satisfy the repository’s story-engine and hook-source gates before drafting; user approves script.
Storyboard	Shot IDs, framing, actions, durations, source assets, transitions and continuity requirements.	User approves shot plan.
Assets	Inspect authentic footage/specimens; prepare approved graphics and audio; generate support only if authorized.	Scene-by-scene asset review before full composition rendering.

Stage	Output / action	Gate
Edit and sound	Assemble the picture, restrained labels, subtitles where needed, handling sounds, speech and licensed music if selected.	Preserve approved medium and factual claims; no silent fallback to a slideshow.
Render and QA	Check encoded dimensions, duration, frame rate, audio, readability and representative frames.	Technical success alone does not establish creative quality; record remaining defects and revise.
Delivery	Final MP4, editable sources, poster frame where appropriate, asset provenance and QA notes.	User reviews deliverables. Publishing requires separate explicit authorization.

3. Available resources and capability limits

Resource	Verified state
Product photos	Ánh Kim and Ivory photographs opened and probed: each 1354×1804 JPEG. They show sheets, not print results, finished applications or manufacturing.
Brand material	Existing banner inspected. Its warehouse, ink and environmental imagery is not evidence of actual facilities, product scope or certification.
Existing videos	Located in earlier-post/output folders; not verified as authentic evidence for this rebuild. Inspect content and provenance before reuse.
OpenMontage environment	Core Python dependencies installed in the checkout's isolated `.venv`; main project environment unchanged.
Rendering	FFmpeg available. HyperFrames passed diagnostics, but no composition for this project has been rendered. Remotion source exists; its dependencies are not installed.
Generative services	Registry reports image 0/23, video 0/31, TTS 0/13 and music generation 0/5 configured. Availability is not inferred from subscription ownership.
Audio	Audio processing 2/2 configured; music search 1/2 reported available; local music library unavailable. No track selected, downloaded, auditioned or cleared for this project.
Spending	No paid calls made. Obtain service approval and a spend ceiling before any paid research or generation; never request secrets in chat.

4. Questions for the user

Question	Useful answer
What do workshop customers actually hesitate about?	One real question or objection about trying the paper, with an anonymized message or your account of a conversation. If unknown, keep it unknown.
What can you supply or record?	Actual sheets, verified finished pieces, printing/folding trials, workshop access or sample handling. Provide existing file paths, describe what can be filmed, or say filming is unavailable.
What does “thử giấy” offer?	Sample availability, charges/shipping and the next step after contact. Do not assume samples are free.
If paid support becomes necessary, what is permitted?	Approved service access and maximum spend, requested only when a concrete production route requires it. Default remains no paid calls.

5. Evidence, preservation and saved state

Item	Rule / location
Original hypothesis	`local/paper-ink-product/posts/hypothesis.json`, post 4. Unchanged; retain planned status. Preserve tried posts and historical measurements.
Measurement	Count distinct relevant workshops asking about trial conditions and agreed next steps over seven days; use attention metrics as secondary evidence. Missing inquiries remain unknown, not zero.
Historical baseline	Publication `reel-1421837226123438` and its 2026-10-20 receipt are exploratory context, not a matched comparison proving the new direction. The older recorded review remains unapproved.
OpenMontage workspace	`projects/OpenMontage/projects/paper-ink-post-4-rebuild/` relative to the social-content repository root.
Saved artifacts	`artifacts/intake.md`, `research_brief.json`, `source_media_review.json` and `preflight.json` inside that workspace.
Checkpoints	`checkpoint_research.json`: completed. `checkpoint_proposal.json`: in progress, pending resource discovery.
Local production board	Open Backlot, available while the local server is running.

6. Research references

Source	Use / limitation
Fedrigoni Paper Box production account	Object-led film and recorded-object sound precedent; article read, film not watched.
The Possibilities of Paper	Genuine finished applications as evidence; another stock's techniques do not establish our capabilities.
Paper 101: Printing	Actual-stock testing and compatibility cautions, not verification of Ánh Kim or Ivory.
Paper 101: Scoring and Folding	Fold-trial context; no promise of crack-free performance.
Briar Press buyer discussion	Qualitative concern about impression and folding; historical and not representative of Vietnamese buyers.
Artlist Foley article	Detailed sound can shape emotion; not automatically calming.
TikTok product-advertising guide	Product demonstration and CTA guidance; not evidence of Facebook conversions.
